

Production and Export of the Best of Leather Bags and Shoes

KASPIAN LEATHER

Introduction

Iran is one of the countries of Southwest Asia (Middle East) with Afghanistan and Pakistan in the east, Turkmenistan in the northeast, the Caspian Sea in the middle in the north, the Republic of Azerbaijan and Armenia and Turkey in the northwest, Iraq in the west and finally it is bordered to the south by the waters of the Persian Gulf and the Oman Sea

The Islamic Republic of Iran due to its large population, political stability potential economic resources and most importantly having the largest coast of the Persian Gulf and dominating the strategic Strait of Hormuz and its connection to Central Asia and the Caspian Sea, as a bridge between Asia Europe, and Africa. It is of great geopolitical importance and can take the necessary measures to increase the exchange of goods

Therefore, with having more than two thousand kilometers of coastline from the mouth of the Arvand River to the Gwadar seaport, in addition to dominating the waterways leading to the Indian Ocean, it is the only country that can transport various export products by land to many parts of the world Keep in mind that Iran has been a member of free trade with Eurasia since October 27, 2019, and Eurasia is Iran's new partner. This is an important advantage for Iran, because these countries are also consumer-oriented countries, and Iran as a producing country can easily export its goods to these countries.

Central Asian countries, India, Pakistan and Afghanistan are also consumerist countries and, most importantly, like Iranian goods.

These two cases are enough to make Iran one of the main suppliers of Leather Bag and Shoes in the region. In the meantime, we can mention Iran's good and friendly relations with the CIS countries, which will lead to economic prosperity in all countries.

There are also some countries, such as Ukraine and other Eastern European countries, for which buying Iranian goods is not very expensive. In addition the quality of Iranian goods has been approved by many countries in the region and the world.

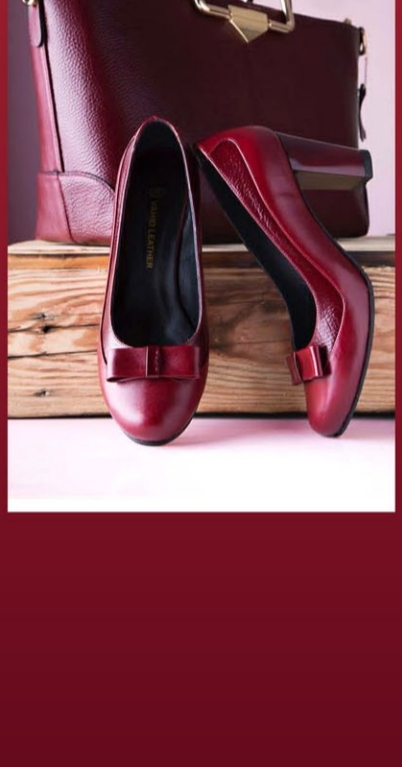

Iran's convenient geographical location speeds up the transfer of goods and communication, and this speed and time savings in trade is very valuable Iran is in the middle of the world. Compared to European countries, we can deliver goods in the fastest time. Central Asian countries can also easily receive our export goods. However, a country like China does not have our position But it has made great use of its existing capacity.

So Iran's first advantage in trade with the world is that this land has a strategic position in the Middle East. Another very important advantage of Iran's exports compared to other countries is the very low cost of labor wages. This teaches us to work for exports in goods where the wages of the worker (i.e. manpower) are very low The more effective this cost is on the cost of that commodity, the more competitive that commodity has in the export market. One of these goods can be considered the field of chemicals in Iran.

So with these interpretations, we can open a special account on Iran in the purchase and export of leather shoes and bags.
